

PITTSBURGH PIPE

SINCE 1977

POSITIVE TRAIN CONTROL (PTC)

The Premier
Provider of PTC Duct

Features/Services:

Positive Train Control (PTC) technology is designed to stop trains before a human error causes an accident. Part of the Rail Safety Improvement Act of 2010, PTC is a large technical undertaking requiring a new safety system, with hundreds of thousands of components. These components need to work with freight, commuter and passenger rail lines. From the beginning of this safety initiative, Pittsburgh Pipe has supplied the required PTC duct and ancillary products to many of the Class I railroads and Directional Drilling Contractors working on the project.

About Pittsburgh Pipe

Since 1977, Pittsburgh Pipe has been America's supplier of pipes and construction materials for a wide range of industries. Our reputation for rigid quality standards, exceptional customer service, and industry knowledge has taken off with contractors across the country.

THE RIGHT PIPE. RIGHT ON TIME.
