

PITTSBURGH PIPE

SINCE 1977

Broadband Solutions for Rural Expansion

Partner with Pittsburgh Pipe to supply the essential materials for rural telecom and broadband expansion.

How We Help Your Broadband Expansion Efforts

At Pittsburgh Pipe, we understand the unique challenges of rural broadband expansion. Our telecom products—ranging from HDPE conduit to aerial ducts and more—are designed to support rural deployments with durability and efficiency. We offer materials tailored to withstand harsh environmental conditions, so your broadband networks are built to last and perform reliably for years to come.

Building Stronger Connections

Pittsburgh Pipe is an affiliate member of the following organizations:

- ✔ International Association of Foundation Drilling
- ✔ American Welding Society
- ✔ Deep Foundations Institute
- ✔ National Association of Steel Pipe Distributors
- ✔ National Utility Contractors Association
- ✔ Power and Communication Contractors Association

Telecom Products Designed for Rural Success

HDPE Conduit

Flexible and corrosion-resistant, our HDPE conduit is perfect for rural broadband projects.

Aerial Duct

Ideal for crossing roadways, railways, and waterways, aerial duct allows for easy cable replacements.

Handholes and Pull Boxes

Our high-quality handholes and pull boxes provide secure access points, protecting broadband infrastructure.

MaxCell Innerduct

MaxCell Innerduct optimizes available cable space and increases flexibility.

Cable in Conduit (CIC)

CIC offers superior protection from moisture, impact, and chemical vapors, extending the lifespan of cables in harsh conditions.

Don't Let Rural Areas Fall Behind—Contact Pittsburgh Pipe Today!

Secure the telecom products you need for broadband expansion. Don't wait—enhance your network infrastructure with materials designed to last!
