## Where Precision Meets Strength

At Pittsburgh Pipe, we provide expertly fabricated lifting lugs and lifting eyes for drilled shaft and heavy-duty construction projects. Whether the project requires custom-cut lifting eyes or welded-on lugs, we deliver solutions tailored to your demands. Our team ensures every element is manufactured with precision and backed by full compliance documentation.

### Our Drilled Shaft Support Solutions

#### Custom Lifting Eyes

Cut to your specifications into flat steel before rolling, commonly installed two per pipe.

#### Weld-On Lifting Lugs

Fabricated and welded to fit your exact lifting and handling needs on-site.

#### Reinforcing Bands

Increase durability and structural support for drilled shaft casing.

#### Turning Slots & J-Slots

Essential features for rotation and installation in challenging soil conditions.

#### Cutting Teeth Attachments

Installed to help pipe penetrate tough materials during installation.

#### QA/QC Documentation

Comprehensive compliance records and shop drawings included with every project.
